Cardiology and Vascular Health: Pathophysiology, Therapeutics and Epidemiology

Message from the Guest Editor

Cardiovascular diseases (CVDs) are among the most critical public health challenges in the modern world. Atherosclerosis is the main pathogenetic process leading to the development of CVDs. In the course of atherosclerosis, coronary heart disease, cerebrovascular disease, and peripheral arterial disease may develop. Diabetes, hypertension, dyslipidemia, obesity, smoking, and low physical activity are among the most important modifiable cardiovascular risk factors. Improving our knowledge regarding CVDs is essential in order to achieve superior patient care. Research in this area should, on the one hand, concern the diagnosis and treatment of overt cardiovascular disease, and on the other hand, focus on the identification of the dysfunction of the cardiovascular system at the subclinical level, which may affect therapeutic management and prevent the development of cardiovascular events. An individual approach to each patient is essential, which is in accordance with the concept of personalized medicine. Genetic testing also plays a key role in this regard.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
