

## Special Issue

# New Trends in Precision Medicine

### Message from the Guest Editor

Precision medicine has emerged as a powerful model that focuses on how biomolecular factors can influence individual responses to different medications/therapies affecting drug efficacy, side effects, and adverse events related to therapy. Although personalized medicine emerged from pharmacogenetics, it now covers many fields of healthcare. Personalized nanomedicine involving individualized drug selection and dosage profiling in combination with clinical and molecular biomarkers can ensure the maximal efficacy and safety of treatment. Accordingly, regenerative medicine and cellular therapy as the new fields of medicine use cell-based products in order to develop personalized treatments. The major hindrance to the development of such therapies is the handling of the associated “Big Data,” to keep the databases updated. This Special Issue seeks research papers on various aspects related to the emerging field of precision medicine, dentistry, and oral health, covering different aspects of the basics of translational research, regenerative medicine, and personalized treatments.

### Guest Editor

Prof. Dr. Salvatore Scacco

Department of Basic Medical Sciences, Neurosciences and Sensory Organs, University of Bari “Aldo Moro”, 70124 Bari, Italy

### Deadline for manuscript submissions

closed (5 January 2023)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Editor-in-Chief

Prof. Dr. David Alan Rizzieri

1. Novant Health Cancer Institute, Winston-Salem, NC 27103, USA

2. Division of Hematologic Malignancies and Cellular Therapy, Duke University, Durham, NC 27710, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
