

## Special Issue

# Personalized Medicine of Digestive Diseases

### Message from the Guest Editor

The *Journal of Personalized Medicine* is pleased to announce a Special Issue focused on digestive disease (DD)-related topics, including in the esophagus, stomach, small and large intestines, and rectum. This Special Issue aims to present the emerging studies and developments in DD diagnosis, management, and treatment. We are interested in articles that explore not only novel imaging techniques, endoscopic and surgical management, and systemic therapies, but also the pathophysiology, molecular biology, and gut microbiome of DD. We welcome original studies, clinical case reports (sample size no less than 10), and reviews from researchers, clinicians, and experts in the field. This Special Issue is an excellent opportunity to share your study with a broad audience of medical professionals and advance our understanding and treatment of DD.
