Selected Papers from the 2nd Conference with International Participation "Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine"

Message from the Guest Editors

This Special Issue is aligned with the second conference with international participation, "Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine," which will be held in Novosibirsk (Russian Federation), 24–25 November 2022. The purpose of this conference is to disseminate the latest basic and clinical findings in the fields of etiology, clinical characteristics, and modern diagnostics and treatments of endocrine disorders among a wide spectrum of specialists. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Genomic research in endocrinology;
- Biochemical characteristics of endocrine aberrations;
- Cellular technologies in endocrinology;
- Metabolomic research in endocrinology;
- High-tech care of patients with endocrine disorders;
- and other related research in this field.

We look forward to receiving your contributions.
