

Special Issue

Islamic Finance

Message from the Guest Editors

The objective of this Special Issue is to consolidate rigorous research work focusing on risk management in Islamic finance. While Islamic finance traditionally carries a disposition towards legal matters, recent strides in its implementation and research have made it accessible to contemporary economic and financial theory. Prospective papers would be focused on risk-related topics such as identifying risks unique to Islamic finance and especially rigorous risk-management strategies. However, we do note that the types of risks encompassed by the Islamic finance literature is quite broad, including things such as Sharī'ah risk. Therefore, a discussion of topics such as how the distribution of financial practices adopted can affect certain financial variables would also be considered. Keywords

- Islamic finance
- Securitisation
- Risk Management
- Financial management
- Behavioural finance
- Insurance/Takaful
- Contract theory/ Mechanism design in Islamic finance

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
