

Special Issue

Inflation Hedging Instruments

Message from the Guest Editor

Inflation is a risk that every investor must challenge. Money tends to lose its value over time, and the inflation rate also changes depending on the events that take place. The wave of global inflation has not yet cooled down. The prices are rising, and the value of assets is shrinking as a result. In addition to gold- the traditional inflation hedging tool, do financial assets such as stocks and bonds, and real assets such as real estate, infrastructure, natural resources, and forestry, etc. have an average rate of return greater than the rate of inflation during the period of rising inflation? Hopefully, through this Special Issue, we can discuss and provide optimal solutions to avoid inflation risks to satisfy those in need.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
