# **Special Issue**

# Feature Papers for Kidney and Dialysis: Advances in Nephrology and Dialysis—Series II

# Message from the Guest Editor

This new edition of Special Issue in *Kidney and Dialysis* aims is to cover most of these areas through feature reviews, original articles and keeping the reader updated on the recent progress in nephrology and dialysis. The topics of this Special Issue include but are not limited to:

- Chronic kidney disease (CKD), complications, and nutrition;
- Cardiovascular and renal risk in CKD;
- Pregnancy and CKD;
- Cardionephrology;
- Onconephrology:
- Acute kidney injury (AKI)/critical care;
- Diabetic kidney disease;
- Glomerulonephritis;
- Hypertension and nephrology;
- ADPKD:
- Renal vasculitis:
- Lupus nephritis;
- Kidney amyloidosis;
- Hereditary kidney disease;
- Renal ischemia;
- Dialysis, hemodialysis (HD), peritoneal dialysis (PD);
- Kidney transplantation;
- New diagnosis methods and technologies for kidney function and disease, renal imaging, and renal ultrasound.

#### Guest Editor

Prof. Dr. Vladimir Tesar

1st Faculty of Medicine, General University Hospital, Department of Nephrology, Charles University, Prague, Czech Republic

# **About the Journal**

# Message from the Editor-in-Chief

In recent years, we have been witnessing dramatically increased interest in the treatment of chronic kidney disease, e.g., diabetic kidney disease, glomerular disease, or autosomal dominant polycystic kidney disease, but also aimed more generally on the progression of chronic kidney disease and the complications of chronic kidney disease, such as anemia, or hyperkalemia. This progress has led to changing paradigms as reflected by several recently published KDIGO guidelines which now need to be updated much more frequently than before. To personalize treatment, we also need better diagnostic methods, including validated biomarkers reflecting the activity of the disease (including response to treatment) and predicting outcomes.

Kidney and Dialysis aims to cover most of these areas not only in terms of feature reviews, but also original articles, and to keep the reader updated on recent progress in nephrology and dialysis.

### Editor-in-Chief

Prof. Dr. Francesco Locatelli

Department of Nephrology and Dialysis, Alessando Manzoni Hospital, Lecco, Italy

#### **Author Benefits**

# **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within ESCI (Web of Science), Scopus and other databases.

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 53.2 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the first half of 2024).
