

Special Issue

Public Spaces: Socioeconomic Challenges (Second Edition)

Message from the Guest Editor

This publication intends to examine how public spaces can transform the urban (or rural) context to promote settings of interaction and mutual support, collaboration and sharing, or collective movements of exaltation. The impacts of these newly abstract or physical structures can represent social movements such as residence choices or new inflections in sporadic movements, such as newly induced forms of tourism. The Special Issue will be organized into three parts. The first one will revisit the theoretical framework supporting our vision, while the second one will analyze the possible public policies directed to welfare solutions in an urban context. Finally, the last part will present multiple case studies to illustrate the topics discussed.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany
