

## Special Issue

# The Potential of Land Planning in Achieving the Sustainable Development Goals of the 2030 Agenda

### Message from the Guest Editors

This Special Issue solicits research papers (analytical, empirical, or case studies) which address any of the following seven concrete land (regional, town, and country) planning policy/law areas:

- Identifying and removing planned segregation based on ethnicity, religion, wealth, etc.
- Ceasing and prohibiting forced combinations or subdivisions causing massive, arbitrary, and uncompensated social dislocations, ecological crises, or destruction of heritage.
- Forward planning (by agreement) to provide adequate well-planned land for various uses.
- Instituting new planning instruments (e.g., land readjustments and land bonds) to free land from its outmoded cadastral boundaries to realize its development potential without violating rights to land.
- Instituting new planning instruments to bring about win-win land use outcomes in support of design, technological, and other innovations.
- Planning (by edict if necessary) to correct errors of segregation and other planning mistakes.
- Critical analysis of the feasibility and limitations of the Sustainable Development Goals of the 2030 Agenda in relation to land (i.e., regional, town, and country) planning.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
