

## Special Issue

# Urban Land Use Change and Its Spatial Planning

### Message from the Guest Editors

Submissions are encouraged to contribute to the following sub-themes, but they are not limited to:

- Novel methods and tools, integrated with urban analytics, to examine the interdependency of urban morphology and social, environmental, and economic processes to better inform urban planning as a tool for shaping urban land use.
- Innovative research and case studies examining dynamic interactions within socio-economic-ecological processes and the resulting impacts on urban planning.
- Best practices, as well as successful or unsuccessful endeavours in the concept of open-ended urban planning, giving room to a change as a key constant in urban development.
- Future directions in addressing environmental, economic, and social issues in cities using notion of change as the driving force of urban land use planning.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
