

Special Issue

Ecosystem and Biodiversity Conservation in Protected Areas

Message from the Guest Editors

The goal of this Special Issue is to collect papers (original research articles and review papers) to give insights about these emerging challenges, opportunities, technologies, and tools for implementing ecosystem-based conservation, with an emphasis on actions to support areas designated for biodiversity conservation. This Special Issue will highlight key aspects of ecosystem-based conservation science, from prioritizing places for conservation designation, documenting trends in threats to ecosystems and ecosystem condition, and systematic approaches for taking actions to conserve and restore ecosystems and the species they support. This Special Issue will welcome manuscripts that link the following themes:

- Ecosystem condition assessment;
- Ecosystem degradation;
- Landscape dynamics, alteration, and stress;
- Place-based conservation priorities;
- Management and restoration of socio-ecological systems;
- Climate change vulnerability assessment;
- Biodiversity conservation planning;
- Ecosystem monitoring.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
