

## Special Issue

# Effects of Land Use on the Ecohydrology of River Basin in Accordance with Climate Change II

### Message from the Guest Editors

In recent years, there has been increasing recognition of the importance of adapting to climate change. The relationship between land use and hydrology is a critical factor that heavily influences the land–climate interaction. Environmental engineering practices such as river restoration and biodiversity conservation can play essential roles in promoting sustainable land management and increasing ecological resilience, particularly in water bodies prone to droughts. We are delighted to invite articles that center around the preservation of water resources and ecological concerns for this Special Issue. Additionally, we will cover other related topics such as climate change scenarios, hydrological challenges' mitigation, and the rejuvenation or sustenance of aquatic ecosystems. We encourage the development of new approaches to adapting to climate change that can help ensure habitat restoration and landscape protection. Moreover, the publications will provide evaluations of regional ecohydrological problems based on the NBS (nature-based solution) concept in different parts of the world.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
