

## Special Issue

# Agroforestry Systems for Sustainable Land Management: Innovations and Challenges

### Message from the Guest Editors

Agroforestry, blending trees with crops, is key for biodiversity, ecosystem services, and sustainable land use. It tackles climate change, food security, and biodiversity loss, enhancing agricultural productivity and soil health. It faces socio-economic and policy hurdles. This Special Issue invites research on agroforestry's impact, socio-economic aspects, policy support, technological innovations, and local practices, aiming to advance sustainable agriculture and environmental conservation. We encourage submissions on agroforestry's role in climate adaptation, ecosystem services, and landscape management.

### Guest Editors

Dr. Judit Rubio-Delgado

Department of Art and Territory Science, INTERRA Research Institute for Sustainable Territorial Development, University of Extremadura, 10071 Cáceres, Spain

Dr. J. Francisco Lavado Contador

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
