

Special Issue

Living with Unpredictability: Insights from Landscape Historical Ecologies

Message from the Guest Editors

The aim of the Special Issue is to explore global historical ecological approaches to living with unpredictability and the socioecological dynamisms that this required. There is a growing need to position unpredictability as a central historical feature contributing to the development of modern landscapes and for addressing how adaptive responses to uncertainty can best be embedded in planning future sustainability and resilience. The topic will be explored through the following themes: Epistemologies of unpredictability and managing change; Accepting and valuing variability; Fragility and vulnerability of landscapes and human–environment interactions; Multiscalar and holistic socioecological responses; Deep-time perspectives on societal responses to ecological uncertainty. Contributions regarding different geographical regions with a focus on landscape approaches to historical ecology from various disciplines are welcome.

Guest Editors

Dr. Nik Petek-Sargeant
British Museum, London, UK

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
