

Special Issue

Soil and Water Conservation on Degraded Land

Message from the Guest Editors

This Special Issue topic takes into account original proposals in research themes including, but not limited to:

- Impact of pedo-geomorphological hazards on land degradation (soil erosion, gully erosion, landslides, siltation, etc.);
- Land degradation and hydro-climatic hazards (flood, drought, desertification, etc.);
- Human impact on land degradation (deforestation, intensive agriculture, pollution, urban expansion, etc.);
- Impact of land-use pattern and changes on land degradation;
- Natural and anthropic risks associated to land degradation (fertility decline, land abandonment, reducing the quality of the environment and life, poverty, etc.);
- Effective (economic) costs of land degradation;
- Implementing soil and water conservation measures;
- Costs and benefits of land restoration;
- Environmental impact of implementing conservation measures;
- Sustainable management plans and policies;
- Investigating how our environment can be managed sustainably in the future, from both local and global perspectives;
- GIS/RS modern techniques applied to sustainable land management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
