

Special Issue

Institutions in Governance of Land Use: Mitigating Boom and Bust

Message from the Guest Editors

This Special Issue seeks original papers that provide experiences from different parts of the world in the governance of land. The following issues are specifically of interest:

- Country studies comprising land management strategies that enable public and private stakeholders to act in the market in an efficient way.
- Innovations in the assembly of land that address key legal debates associated with interference with individual property rights, for instance, expropriation, the protection of individual property rights, and compensation that must be paid for the compulsory acquisition of land.
- Country studies on approaches to capture unearned increases in land values due to government interventions.
- Country studies on instruments to (re)distribute land-based wealth in a fair way among landowners, land users, property developers and investors, and the public.
- Empirical and theoretical studies on the value of land, both monetary and non-monetary.
- Studies on the management of land rights of indigenous people across jurisdictions.
- Disaster preparedness and resilience through urban planning and land management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
