

## Special Issue

# Planning Sustainable Cities through Nature-Based Solutions

### Message from the Guest Editors

Cities are facing a broad range of social and environmental challenges due to unsustainable, non-resilient urbanization patterns in combination with the effects of climate change. Nature-based solutions harness the power and sophistication of nature to turn these urban challenges into adaptative and innovation opportunities that can make cities more attractive and lead to multiple co-benefits for health, the economy, society, and the environment. These solutions can guide more efficient and cost-effective approaches. This Special Issue aims to provide a forum for current original research covering the different aspects of nature-based solutions for planning sustainable cities. Therefore, I invite academics and practitioners to describe their practical experiences and insights in this field, encouraging contributions that present successful cases of designing sustainable, resilient, and green cities through nature-based solutions and also technical or conceptual reflections.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
