Obstructive Sleep Apnea and Related Disorders: Pathophysiological Traits and Strategies for Treatment

Message from the Guest Editor

Obstructive sleep apnea (OSA) is a common disease that can lead to serious health problems, such as hypertension, diabetes mellitus, dyslipidemia, and neurocognitive dysfunction. It is characterized by intermittent hypoxia and sleep fragmentation due to repetitive collapse of upper airway during sleep. These physiological properties lead to activation and propagation of oxidative stress, inflammation, and sympathetic hyperactivity. Due to the lack of experimental models that can mimic OSA, the underlying mechanisms linking OSA and comorbidities are not clearly elucidated. However, advances in molecular and biological technologies have made it possible to better understand the pathophysiological phenomena of OSA-related diseases. In this Special Issue, we will cover recent outstanding findings regarding treatment strategies, biomarkers, and pathophysiological mechanisms of various diseases associated with OSA, important clinical and epidemiological results, and big data analysis. This integrated approach is expected to provide readers with a better understanding of the pathophysiological consequences of OSA and related disorders.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
