

Special Issue

Coronary Artery Disease from Pathogenetic Mechanisms to Postoperative Prognosis Research

Message from the Guest Editors

Cardiovascular disease (CVD) is currently the greatest threat to human health. Among them, coronary heart disease is still the main cause of death, research on this pathology is an important task. Not surprisingly, it is in this area that tremendous progress has been made regarding pathogenetic mechanisms, diagnostic, therapeutic and prophylactic methods, as well as coronary revascularization. The purpose of this issue is to provide an opportunity to publish their research to different groups of researchers involved in the study of the problem of coronary artery disease. These may include both basic research and clinical research on the diagnosis, treatment, and rehabilitation of various forms of coronary artery disease, myocardial revascularization and predicting its outcomes. Also of interest is the problem of comorbidity in patients with coronary artery disease, which may affect the course and prognosis of the disease. Submission of all types of manuscripts including original research and reviews will be possible.

Guest Editors

Dr. Aleksei N. Sumin

Prof. Dr. Dmitry V. Duplyakov

Prof. Dr. Alexey N. Repin

Deadline for manuscript submissions

closed (25 August 2023)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
