

Special Issue

Multi-Omics for the Understanding of Brain Diseases

Message from the Guest Editors

Omics technologies such as proteomics, genomics, and metabolomics are widely applied for the identification and characterization of new molecular signatures. However, molecular profiling that makes it possible to understand neurodegenerative diseases has been relatively insufficient. Brain diseases such as neurodegenerative diseases and emotional disorders need integrative understanding which draws a more reliable hypothesis for pathology, which can be accomplished via an in-depth study of molecular information. Recently, multi-omics technologies have been eagerly applied to diverse diseases. Because this includes multiple molecular profiling, metadata, and big data processing with informatics and computer science, it is possible to provide new macroscopic as well as microscopic insight to understand diseases. This issue will introduce recent technological advances of multi-omics and the application of omics technology to brain diseases.

Guest Editors

Dr. Jong Hyuk Yoon

Neurodegenerative Diseases Research Group, Korea Brain Research Institute, Daegu 41062, Republic of Korea

Dr. Chiara Villa

Department of Medicine and Surgery, University of Milano-Bicocca, 20900 Monza, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
