Brain Function, Dysfunction and Post-Damage Reorganization, Two Decades of Research

Message from the Guest Editors

In recent decades, some classical dogmas in neuroscience have been reconsidered. Indeed, in contrast with previous conception, new investigation on the physiology and architecture of the human central nervous system led to a new idea of the brain as a plastic and dynamic entity. Moreover, imaging studies and computational models have suggested that complex functional and structural neuronal networks, rather than isolated brain areas, underpin the sensorimotor and cognitive aspects of human behavior. Furthermore, updates in scientific literature have pointed out the critical role of biomarkers in understanding brain functions and diseases. This Special Issue aims to collect and describe recent updates in brain function, dysfunction, and post-damage reorganization from a multidisciplinary perspective. In this Special Issue, several knowledgeable researchers in this field will provide new issues with significant implications in the knowledge of brain physiology, pathology, and repair.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
