Special Issue

Drug Resistance, Molecular Oncology and Genetics of Breast Cancer

Message from the Guest Editors

There has been rapid growth in our knowledge of breast cancer biology and molecular genetics, which has led to a better understanding of this heterogeneous disease, both in terms of its progression as well as improved treatment modalities. Advances in our understanding have facilitated the development of targeted therapy as well as new therapeutic strategies that have greatly improved disease outcome as well as survival. Understanding, dissecting and connecting novel breast cancer mechanistic networks requires multidisciplinary approaches. This Special Issue, "Drug Resistance, Molecular Oncology and Genetics of Breast Cancer", provides the opportunity for scientists and clinicians to present research articles as well as reviews on cuttingedge discoveries in the field of mechanisms underlying breast cancer pathogenesis and therapeutic strategies aimed at targeting deregulated signaling pathways in breast cancer.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
