

Special Issue

Emerging Cytotoxic, Anti-tumor and Anti-inflammatory Bioactive Compounds of Natural Origin

Message from the Guest Editor

The hope of an answer to the unmet desire for more efficient therapies lies within the science, and in the efforts of systematic and laborious research. Equally important are basic investigations that explain the background, cause and effect relationships in the pathogenesis of diseases, and investigations of substances that can be implemented at different stages and sites of the described processes. One of the trends in searching for new therapeutics is to return to Nature. Plants are parts of the same global ecosystem as humans, and try to defend themselves to survive as well. Thus, we can learn and draw inspiration from them, as they are still winning in the evolutionary race. In this Special Issue we aim to collect the latest data on cytotoxic, anti-tumor and anti-inflammatory agents of natural origin—especially plant-derived agents—creating an updated source of information in the field of science that is changing very quickly because of the enormous accumulation of new data.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
