

Special Issue

Organogenesis and Regeneration: From Basic Research to Medical Study

Message from the Guest Editors

Organs are a part of multi-cellular organisms, which are typically self-contained and have specific vital functions. Organ formation requires the coordination of various types of cells that are organized in a specialized pattern to establish a complete and accurate structure and function. Regeneration, which is the restoration of the lost tissues/organs of organisms, is another process that the body carries out to achieve integrity and functionality. Regeneration not only simply recaptures the course of embryonic development, but also possesses unique aspects for successful healing and regeneration after injury. Deciphering the innate mechanisms and understanding the relationship between the biological processes of development and regeneration may help us explore new therapeutic strategies that can benefit human health. This Special Issue, “Organogenesis and Regeneration”, of the journal *Life* will include both original research articles and review articles focusing on the mechanistic studies of organogenesis and regeneration. Studies using a wide range of genetic, cell biological, molecular, genome-wide, and bioinformatic approaches are encouraged

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
