

Special Issue

Advancing Construction Logistics: Unlocking the Potential for Construction Productivity

Message from the Guest Editors

The purpose of this Special Issue in the journal *Logistics* is to examine the current “state of the art” for construction logistics operations globally. Contributions are invited from technology-focused researchers developing new technical solutions and techniques to help deliver construction logistics solutions. Similarly, construction management researchers are invited to provide insights into the processes and procurement management aspects of construction logistics optimization. Of particular interest will be those researchers that can provide up to date case study-based innovations and exemplars from their investigations. The intention ultimately is to provide a benchmark of the current state of knowledge of logistics in construction and therefore a basis from which future researchers can develop their work.

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Editor-in-Chief

Prof. Dr. Robert Handfield
