

# Special Issue

## Bio and Bio-Inspired Lubricants

### Message from the Guest Editor

Discovery, design, and development of new lubricants must meet requirements of nature and engineering applications. Today's lubricants aim to be more efficient, environmentally friendly, and possibility multi-purpose, such as protection and cleaning. In this Special Issue of Lubricants, we discuss state-of-the-art lubricants that are from nature, or inspired by nature, including biological systems. Reviews and recent developments are encouraged to be submitted. The goal is to give us an overview of where we are and help us to develop new understanding as well as new lubricants.

---

### Guest Editor

Prof. Dr. Hong Liang

Materials Science & Engineering, Texas A&M University, College Station, TX 77843-3123, USA

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Homer Rahnejat  
School of Engineering, University of Central Lancashire, Preston PR1  
2HE, UK

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2  
(Mechanical Engineering)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.6 days after  
submission; acceptance to publication is undertaken in 2.5  
days (median values for papers published in this journal in  
the second half of 2024).
