

# Special Issue

## Green Nanotribology

### Message from the Guest Editor

Green nanotribology relates to the most basic aspects of green nanotribological materials, structures, processes, and systems, and the influence of their properties across scales, up to the macroscale of human life. Nanotribological materials, structures, and processes are predominantly based on functionalities at the nanoscale; however, in hierarchical systems, additional functionalities on larger scales than the nanoscale may result in synergistic added values. This Special Issue on Green Nanotribology calls for contributions from researchers and thinkers in all realms of green nanotribology, and welcomes theoretical, experimental, and review contributions from tribologists, physicists, biologists, material scientists, engineers, and mathematicians alike who are engaged and interested in this fast-growing field. Of specific interest for this Special Issue will be papers that touch upon safe nanotribology and sustainable nanotribology which facilitate the high potential of this great field in combination with inherent safety for humans and nature.

---

### Guest Editor

Dr. Ilie C. Gebeshuber

Institute of Applied Physics (IAP), Vienna University of Technology (TU Wien), Wiedner Hauptstrasse 8-10/134, 1040 Vienna, Austria

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Homer Rahnejat  
School of Engineering, University of Central Lancashire, Preston PR1  
2HE, UK

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2  
(Mechanical Engineering)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.6 days after  
submission; acceptance to publication is undertaken in 2.5  
days (median values for papers published in this journal in  
the second half of 2024).
