Experimental and Numerical Characterization of Adhesively Bonded Joint: From Mechanical Properties to New Fields of Application

Message from the Guest Editors

Structural adhesives are high-strength materials specifically formulated to bond dissimilar elements such as metals, composites, and plastics, offering numerous advantages in modern manufacturing and construction and providing strong, durable, and versatile bonding solutions in various applications, including aerospace, automotive, construction, and manufacturing, where strong and durable bonds are essential features. This Special Issue will focus on advancing our shared knowledge of the use of structural adhesives from numerical and experimental perspectives, including the study of mechanical properties, durability, fatigue, repair, recycling, interfacial interactions, surface chemistry, test methods, new adhesive materials, sealants, joint design, manufacturing technology, theoretical models, analytical models, finite element models, analysis, and new areas of application. We invite you to submit a manuscript for this Special Issue. Original research articles and reviews related to any of the above topics are welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
