

Special Issue

Carbohydrates: Origin and Destination of New Materials

Message from the Guest Editor

In recent years, social, economic, and environmental considerations have aimed the spotlight of the scientific and governmental communities on the use of natural renewable resources. This fact is not only motivated by the gradual depletion of fossil resources, but also by our global effort to enhance our progress in a more sustainable way. In this scenario, the development of new materials and processes is key. Carbohydrates, a natural source of plenty of products, are becoming a valuable platform for this purpose. In this Special Issue, works related to carbohydrates as the origin and destination of new materials will be considered, including topics such as:

- New biomaterials based on vegetable carbohydrates (cellulose, hemicelluloses, starches, pectins, derivatives, etc.) for applications in biotechnology;
- New biomaterials based on vegetable carbohydrates (cellulose, hemicelluloses, starches, pectins, derivatives, etc.) for applications in biotechnology;

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
