

Special Issue

Advances in Laser Surface Treated Steels and Light Metal Alloys

Message from the Guest Editor

Dear colleagues, This Special Issue will include original scientific papers that describe new engineering materials and the technological processes of the manufacturing, processing, and forming of their structure and properties in the whole volume and on their surface, and also the description of phenomena and phase transformations appearing in these materials. It will encourage the submission of new fundamental and interdisciplinary contributions on materials science and engineering, and surface engineering, which generally advances material technologies. This Special Issue will focus on some of the important effects of these special laser surface treatment processes, heat treatment, and other material technologies processes on the evolution of the structure–property correlations of some selected metallic alloys, especially those that are technologically advanced. Dr. Mirosław S. Bonek

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
