

Special Issue

State-of-the-Art Biomaterials in Korea

Message from the Guest Editors

This Special Issue is designed to publish a comprehensive study of all the latest biomaterials, medical devices, and digital technologies used in healthcare practice in Korea, which are at the forefront of biomaterial development and commercialization. Additionally, the healthcare system that has recently been highlighted following the Korean response to COVID-19 has helped both industries and academic institutes, furthering the research related to biomaterials applied in medicine and dentistry. Based on one of the largest research funds available, biomaterials have been a key topic in Korea for many years. All studies in this Special Issue should contribute to the development of innovative and practical biomaterials through efforts to overcome the mechanical, chemical, and biological limitations of the past. The topic would include but not be limited to the following themes:

- Current trend of biomaterials research in Korea;
- Biomaterials developed in Korea;
- Test method of biomaterials developed in Korea;
- Clinical studies related to biomaterials in Korean populations.

Guest Editors

Prof. Dr. Sung-Hwan Choi

Prof. Dr. Jae Sung Kwon

Prof. Dr. Junghwan Lee

Prof. Dr. Dohyun Kim

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
