Recent Advances in the Sustainability of Energy- and Resource-Intensive Key Materials

Message from the Guest Editors

In the near future, the global scenario regarding industrial production will need to manage several critical aspects to find a balance between the increase in demand for goods and the environmental impact of industrial production. Converging concerns are related to energy and resource demands, which are the basis of revisions to energy production policies, energy efficiency implementation, green chemistry processes and circular economy approaches. The challenge is even more difficult for several key materials (which the current infrastructure growth is grounded on) that are crucial for near-future developments and are currently impossible to substitute. Please view more details, including submission entrance (“Submit to Special Issue” option on the left side of the website), via the Special Issue website at:

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
