Special Issue

Synthesis, Characterization, and Degradation of Advanced Optical and Photo-Active Materials

Message from the Guest Editors

This Special Issue seeks to highlight original research papers or review articles that report on the current state-of the-art in synthesis and characterization of optical materials and the topics of light–matter interaction (i.e., photo catalyst materials), a critical subject of degradation and reliability of advanced optical and photoactive materials. Key unique features in this Special Issue are

- Optical properties of material systems;
- The (nano)materials aspects of optical phenomena;
- The materials aspects of devices and applications;
- Inter-relating optical materials ageing to the product failure;
- Investigating the integration of several stresses (thermal, moisture, light radiation, mechanical damage, and more) into the performance of a large-scale system;
- Multiscale/multiphysics simulation and experimental techniques of optical compounds in micro/optoelectronic devices (PCB, subassemblies);
- Reliability and failure in optoelectronic devices (light-emitting diodes or LED);
- Optical materials in OLEDs, in photoactive devices and in solar cells.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)
