

Special Issue

Processing of End-of-Life Materials and Industrial Wastes

Message from the Guest Editor

This issue is an international forum for the fast publication of scientific developments in the field of processing of end-of-life materials and solid industrial wastes. Targeted materials cover but are not limited to broad spectra including e-scrap, end-of-life vehicles, spent batteries and catalysts, slags, ashes, dusts, sludges, etc. Selective extraction and recovery of valuable, critical, and strategic elements contained in these waste materials will be highly appreciated topics. The issue particularly emphasizes on innovative approaches and advanced understanding related to thermal and combined methods for the processing of complex residues. Research contributions addressing recent progress in industrial wastes transformation into useful materials and involving greener and/or more sustainable chemistry and process are greatly encouraged.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q1 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q2 (Condensed Matter Physics)
