Special Issue

Mathematics on Automation Control Systems

Message from the Guest Editor

Automation Control Systems have continued to enjoy a strong interaction with research in stochastic processes. The goal of this Special Issue is to explore such interactions between stochastic processes and mathematical finance. We are inviting submissions in various areas of current interest on dynamic systems and control systems. Both theoretical and applied research manuscripts are welcomed, as are papers on emerging areas of control systems and interdisciplinary topics. The submitted manuscripts are required to involve a formal treatment including the use of an acceptable rigor from the mathematical point of view. Prof. Dr. Manuel De la Sen

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:
JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
