Special Issue

Retinal Diseases: Clinical Presentation and Novel Treatments

Message from the Guest Editors

Within the past decade, therapies and imaging techniques for retinal diseases have emerged. Advances in imaging, including various optical coherence tomography (OCT) techniques, OCT angiography, multi confocal scanning laser ophthalmoscopy (MCSLO), and adaptive optics, have revolutionized how we can detect and understand retinal disease presentation. Various therapies that have revolutionized retinal disease management have also been introduced, such as multiple anti-VEGF intravitreal injection therapies for neovascular age-related macular degeneration. Research has also focused on various treatments, including gene therapy, complement component targeting, episcleral brachytherapy, subthreshold micropulse laser, and port delivery systems. We are pleased to invite you to submit your work for a new Special Issue entitled "Retinal Diseases: Clinical Presentation and Novel Treatments". We welcome the submission of original research articles or reviews that discuss the recent advances in understanding the clinical presentation of retinal disease and/or the novel treatments that have emerged for these diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
