Recent Advances in Preeclampsia and Fetal Growth Restriction

Message from the Guest Editors

Around the world, fetal growth restriction (FGR) is a common pregnancy complication and a major contributor to stillbirths, neonatal deaths, and both short- and long-term neonatal morbidity. It has been suggested that FGR should be broadly divided into early-onset (32 weeks) FGR based on gestational age at diagnosis. Late-onset FGR is the most common form of FGR, with a prevalence of 5–10%. Unlike early-onset FGR, it is usually milder, is less likely to be associated with pre-eclampsia, and is usually associated with normal umbilical artery Doppler. This Special Issue aims to attract original research as well as review articles describing all aspects of pre-eclampsia and fetal growth restriction, including but not limited to pathogenesis, diagnosis and prognosis, treatment strategies, and short- and long-term consequences. Topics will include, but are not limited to, the following:

- Pathogenesis and underlying mechanisms;
- Prevention;
- Diagnosis and prognosis;
- New approaches of managing pre-eclampsia and fetal growth restriction;
- Short/long-term consequences.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
