

Special Issue

Polymer Electrolyte Membranes

Message from the Guest Editors

The aim of this Special Issue on “Polymer Electrolyte Membranes” is to share the recent ideas and development of novel polymer electrolyte membranes applied in energy storage and generating systems, such as proton and anion exchange membrane fuel cells, water electrolysis, lithium (or metal) solid secondary batteries, and other energy storage systems. Major concerns include not only the synthesis and properties of polymer electrolyte membranes but also the fabrication and electrochemical performance of membrane electrode assembly (MEA) and theoretical analysis of ion conduction behavior in polymer electrolyte membranes.

Guest Editors

Prof. Dr. Dukjoon Kim

School of Chemical Engineering, Sungkyunkwan University, Suwon, Gyeonggi 16419, Republic of Korea

Dr. Byungchan Bae

Fuel Cell Laboratory, Korea Institute of Energy Research, Daejeon 34129, Republic of Korea

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC
3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
