

Special Issue

Surface and Interface Engineering of Polymeric Membrane

Message from the Guest Editor

We invite authors to contribute to this Special Issue dedicated to collect key contributions related to the Surface and Interface Engineering of Polymeric Membranes with their original research and comprehensive review articles. The potential topics include, but are not limited to:

- Surface engineering and functionalization of polymeric membranes and their applications
- Polymeric membranes interface manipulation and applications
- Fundamental mechanisms behind the surface and interface modification of polymeric membranes
- Functional nanostructured polymeric membranes
- Sustainability footprint behind the surface and interface manipulation of polymeric membranes
- Novel properties derived from the surface and interface engineering of polymeric membranes

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC
3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
