

Special Issue

Lipid Signaling, Therapeutics and Controlled-Release

Message from the Guest Editors

The International Conference on the Bioscience of Lipids (ICBL) is the foremost academic forum in the world today for the presentation and discussion of the latest developments and discoveries regarding the chemical, biological, nutritional, and clinical aspects of lipids. Founded by Nobel Laureates Sune Bergström, Christian de Duve, and Konrad Bloch, the spirit of the ICBL is to provide a friendly and intellectually stimulating environment where the latest discoveries and ideas on lipid science can be freely discussed and young and established researchers alike can gather to build new collaborations and long-lasting friendships. This year, the conference will comprise the following six sessions. These themes cover a wide spectrum of biomedical sciences. 1. Advances of Lipidomics; 2. From Lipid to Biomarker; 3. Disorders in the Lipid Metabolism: Mechanism and Solution; 4. Lipid Diversity and Evolution; 5. Lipids in Clinical and Translational Research; 6. Lipids in Immunology. This Special Issue aims to collect the most important and up-to-date findings presented at the conference.

Guest Editors

Prof. Dr. Wen-Lung Ma

Graduate Institute of Biomedical Sciences, China Medical University, Taichung 406040, Taiwan

Dr. Hung-Yu Sun

Department of Physiology, College of Medicine, National Cheng Kung University, Tainan City 701, Taiwan

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo
Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
