

## Special Issue

# Metabolomic Applications in Animal Science

### Message from the Guest Editor

Metabolomics has been a useful method for various study fields. However, its application in animal science seems not enough. Metabolomics will be useful for various studies in animal science: Animal genetics and breeding, animal physiology, animal nutrition, animal products (milk, meat, eggs, and their by-products) and their processing, livestock environment, animal biotechnology, animal behavior, and animal welfare. More application examples and protocols for animal science will promote more motivation to use metabolomics effectively in the study field. Therefore, in this Special Issue, I invite research and review articles for “Metabolomic Applications in Animal Science”. The contribution to animal science should be clearly stated in the manuscript. The main methods used should be mass spectrometry, nuclear magnetic resonance spectroscopy, or other suitable techniques. Not only nontargeted but also targeted analysis of metabolites are welcome. The topics include dietary and pharmacological interventions, metabolic flux analysis, genetic manipulations, in vitro/in vivo imaging, and protocols for metabolomic experiments.

### Guest Editor

Dr. Shozo Tomonaga

Graduate School of Agriculture, Kyoto University, Kyoto 606-8501, Japan

### Deadline for manuscript submissions

closed (31 May 2020)

## About the Journal

### Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

### Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2024).
