

Special Issue

Internal Medicine, Clinical Immunology and Metabolic Diseases

Message from the Guest Editors

For a long time, immunity and metabolism have been considered as separate fields of research with little connections/gateways. However, over the last decade, hypothesis-free approaches have demonstrated the involvement of immune cells in metabolic diseases, but also the imbalance of metabolic pathways in immune diseases. This Special Issue of *Metabolites*, “Internal Medicine, Clinical Immunology and Metabolic Diseases”, will be dedicated to dealing with interactions between immunity and metabolism in both immune and metabolic diseases. This Special Issue is intended for basic research, but also translational and clinical studies, as well as both hypothesis-led and hypothesis-free studies.

Guest Editors

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
 2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2024).
