

Special Issue

Metabolomics Meets Neuropsychiatry

Message from the Guest Editors

Neuropsychiatric disorders (NPDs) such as schizophrenia, depression, bipolar, anxiety, substance abuse, attention deficit hyperactivity disorder, etc. have complex pathophysiology limiting the understanding of pathomechanisms and the discovery of novel biomarkers and therapeutic alternatives. This Special Issue, "Metabolomics Meets Neuropsychiatry," will highlight the implications of targeted/untargeted metabolomic approaches in understanding the mechanisms behind NPDs, as well as the therapeutic and adverse effects of drugs and identifying novel biomarkers. We invite the submission of original research and review articles covering this area of research, as well as studies investigating the effects of pharmacological interventions on altering the metabolites (neurotransmitters, lipids, amino acids, etc.) in NPDs and associated metabolic disorders. Furthermore, studies investigating the desired/adverse effects of drugs and drug metabolites in treating NPDs are also encouraged for submission.

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
 2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2024).
