Analysis of Specialized Metabolites in Natural Products

Message from the Guest Editors

We are pleased to announce a Special Issue dedicated to the “Analysis of Specialized Metabolites in Natural Products”. Specialized metabolites, also known as secondary metabolites, play crucial roles in organisms–environment interactions, contributing to defense mechanisms, signaling, and adaptation. These compounds, often unique to specific species, are characterized by remarkable biological and pharmacological properties. This Special Issue aims to bring together cutting-edge research and reviews that explore the diverse methodologies and technologies employed in the isolation of these compounds and the determination and evaluation of their structure, pharmacological properties, and drug potential. We invite contributions that cover a broad spectrum of topics, including but not limited to analytical techniques, metabolite identification and characterization, bioactivity evaluation, and applications in natural product research. This Special Issue aims to provide a comprehensive overview of the current state of research in the field and highlight future directions and challenges.

Guest Editors

Dr. Aikaterini Koutsaviti

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo
Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-
Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
