

Special Issue

Metabolomics and Its Application in Human Diseases

Message from the Guest Editor

Metabolomics is a rapidly growing and promising field facilitating innovations and discoveries in the life sciences and in biomedical research. Metabolomics has emerged as an essential tool for studying metabolic processes, the stratification of patients, as well as illuminating the fundamental metabolic alterations in disease onset, progression, or response to therapeutic intervention. Standalone, or as a part of multi-omics protocols, metabolomics contributes significantly to putting into practice the principles of precision medicine. Therefore, this Special Issue of *Metabolites* is tailored to the biomedical community. It combines timely reviews discussing the challenges associated with metabolomics and its integration with other omics methods and protocols, applied towards human disease studies with research articles presenting new findings and results related to metabolomics application in research related to human diseases.

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2024).
