

Special Issue

Recent Advances in Microstructure and Mechanical Properties of High-Strength Steels

Message from the Guest Editor

This Special Issue aims to provide a platform for the dissemination of the latest research and developments in the field of high-strength steels, with a particular focus on the relationship between microstructure and mechanical properties. High-strength steels are of great importance in various industries, such as automotive, aerospace, and infrastructure, due to their superior strength-to-weight ratio, durability, and cost-effectiveness. The scope of this Special Issue includes a wide range of topics, including, but not limited to: - Novel steel compositions and microstructural design strategies for enhanced strength and ductility - Advancements in thermomechanical processing and heat treatment of high-strength steels - Characterization techniques for in-depth understanding of microstructural evolution and phase transformations - Modeling and simulation of microstructure-property relationships in high-strength steels - Innovative manufacturing and joining techniques for high-strength steel components - Corrosion and wear behavior of high-strength steels in service environments

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
