

Special Issue

Advanced Technologies in Metal Matrix Composites

Message from the Guest Editors

It is our pleasure to invite you to submit a manuscript to the forthcoming Special Issue “Advanced Technologies in Metal Matrix Composites” of the international peer-reviewed open access *Metals* journal. This Special Issue is devoted to advanced technologies related to metal matrix composites (MMCs). MMCs, due to their physical and mechanical properties, are important in different industries such as railway, construction and automotive. The combination of different constituents in their structures makes them suitable for some specific applications including wear resistance, energy absorption, load bearing and decoration. The specialists in this field are invited to submit their experimental and numerical research results related to recently developed MMCs. MMCs using different metallic matrix alloys and manufactured with different techniques will be considered for publication in this issue. The current Special Issue will provide a forum for experts to share the manufacturing techniques, investigation, and applications of MMCs. Research and review articles, along with short communications, are invited for consideration in this Special Issue.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
