

Special Issue

Microstructure-Mechanical Properties and Application of Magnesium Alloys

Message from the Guest Editors

Given the extensive scientific and technological importance of this topic, the guest editors of this Special Issue have teamed up to collect reports on the current status in the field and discuss future trends in R&D activities and industrial magnesium applications and processing technologies. This encompasses advanced materials characterization at different length scales, microstructure manipulation using alloying, thermomechanical treatments, as well as modern material modeling to establish the best composition/processing/microstructure combinations for targeted applications. The aim of this Special Issue is thus to cover a broad scope of contributions that highlight current accomplishments and provide the readers with some perspectives of where research on magnesium alloys is heading in the near future with respect to global challenges.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
