

## Special Issue

# Semiconductor and Energy Materials and Processing Technology

### Message from the Guest Editor

Semiconductor and energy materials and processing technology are widely employed in optical devices, electronic devices, sensors, energy, displays, and semiconductors. These semiconductor and energy materials are deposited using metals, ceramics, dielectrics, carbon materials, composites, and hybrid materials, and are widely utilized in the electronics industry, such as in the semiconductors mentioned above. In addition, these semiconductor processing technologies comprise various processes such as PVD (Physically Vapor Deposition), CVD (Chemically Vapor Deposition), ALD (Atomic Layer Deposition), sol-gel processing, electroplating, and electroless plating. The development of high-performance optics, energy, sensors, displays, and semiconductors requires the development of new thin film materials and processes. Therefore, this Special Issue aims to provide an overview of materials and processing technologies that can be employed in various new devices.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
