

## Special Issue

# Microfluidics for Biological and Medical Analysis, Detection and Diagnosis

### Message from the Guest Editors

Microfluidic technology platforms enable the miniaturization and integration of various laboratory functions, offering significant advantages such as reduced sample consumption, enhanced sensitivity, rapid analysis, and portability. The unique phenomena at the small scale of microfluidic technology have generated exciting research and enabled the development of practical applications in recent years. Thus, the use of microfluidic components in biological and medical research has increased, becoming a widely adopted tool. In this Special Issue, we seek research and review articles that highlight recent advances in the application of microfluidic technology, demonstrating its potential impact on detection and diagnostics in biology and medicine. Microfluidic-based devices may also include microfluidic chips, microfluidic paper-based devices, and lab-on-a-chip, lab-on-paper, paper-strips, point-of-care devices. In addition, practical microfluidic technology platforms that exhibit the ability to solve real-world problems are of particular interest.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
